KILLED AT DALLAS.

A Negro "Trusty" Killed by a Police Officer While Resisting Arrest-Their Respective Records.

Special to the Gazette.

Dallas, Tex., May 19 .- Tom Green . a negro aged about twenty-three years. was killed between 4 and 5 o'clock this afternoon by Police Officer Lamar in "Stringtown," East Dallas, under the following circumstances: About a year ago Green was arrested for an assault to murder. He was confined in the county jail until the latter part of January, FOR YOURSELF, when he was released on ball. Shortly For low LIVE STOCK. Tendered him after his second arrest. but . was a prisoner at the jail on the original one, and was used as a "trusty." Shortly after 1 o'clock this afternoon Jailer Rhodes wanted him to do something and found that he had gone out riding, and taken one of Sheriff Lewis' horses, without saying anything to any-one. Later in the afternoon Officers lamar and Estell, who were standing fear the corner of Cochran street and the road leading from the city limits that runs parallel of the Houston and Texas Central railroad, saw Green mounted on Lewis' horse coming in from the suburbs. He dashed past them on Cochran street. They followed him. He then took a cross street and started to ride back. Officer Lamar went around the block in different direction and met him on the corner of Cochran and a short street whose name the officers cannot give. Here officer Lamar attempted to Green. The latter refused to halt, but on the contrary tried to ride the officer down, reaching at the same time in the direction of his hip pocket. Lamar then fired two shots at him, the second shot striking him and killing him in-Lamar, after the shooting. stantly.

proceeded to the county jail the surrendered himself to Sheriff their. The dead darky was a big, burley fellow. Besides the charge pending against him for assault to murder, he had a record of two terms in the state prison for burgiary and theft. Officer comar has been on the police force since last October. He is a man of excellent reputation, having at one time been a well-to-do business man. He does not drink, and has made a record for the quiet but faithful and fearless discharge of his duty since joining the police force. An inquest is being beld on the body of the dead man to-night.

Anneunces for Attorney-General.

Eperial to the Gazetta. A. Culberson, the able young lawyer and eloquent orator of this city, has decided to enter the race for attorney-general, and has authorized the statement that he will be a candidate for that office, subject to the action of the state Democratic convention.

Mr. James McCane, chief city detective, has resigned. He proposes to make St. Louis the neld of his operations here-

Chiengo Waiters. CHICAGO, ILL., May 19 .- Fifty-nine waiters employed at the Palmer house,

committee was appointed to call upon the Tremont house, Auditorium and Palmer house and present demands of the Alliance for recognition and better pay, if event of a refusal to order a strikat noon in all places mentioned. Presiine dent Pomeroy has gone to New York,

Glisey house in New York, and in the event of a refusal on the part of Mr. Southgate to accede to the demands made for Auditorium waiters, the waiters in the New York hotel will be called out. About thirty walters at the Tremont house and an equal number at the Commercial hotel went on a strike to-day. No action was taken at the Grand Pacific. as the management has promised to sign the scale if the others do. At the auditorium the acting manager signed the scale subject to the approval of Manager Southgate upon his return from New

THE PANHANDLE.

York.

The Eapld and Substantial Improvements tha, Are Centering Around Amarillo, the Princess City.

A GAZETTE man last night met H. H. Brookes, editor of the Amarillo Champlon, who has come down to view the glories of the Spring Palace and to distribute a large edition of his paper among the visitors to Fort Worth, and, knowing that he would be informed in regard to the reported lariating of school sections around Amarillo and Panhandle City, he asked him to make a statement

Mr. Brookes said that it was true that scores of sections had been taken up and held in fraud around Pahandle City, and that it had done more to retard the growth of that town than all other agencies combined. The land office at Austin had been appealed to time and time again, but no satisfaction could be ob-tained by intended actual settlers, and the hirelings of the men who had furnished the money to take up the claims on the school sections and to erect the small shanties on them did not scruple to urge the men to prove up their claims, to the detriment of the settlement of the country. To a great extent it was simply a case of swearing to actual occupancy and residence where men had not been on the claims for months.

But what about Amarillo? was asked. I think, he replied, from observation and actual knowledge that only a very few school sections are now lariated out for speculative purposes. There was a time when many were held around Amarillo, but with the exception of a very few the claims have all been sold out to enterprising, progressive citizens, and on many of the sections from \$4000 to \$3000 worth of improvements have been made.

What is the nature of the permanent improvements being made in and around Amarillo?

I cannot remember all, but will tell you a few, he answered. The contract for the erection of a \$10,000 Potter county stone bank building has been awarded and work is to commence in the morning on the foundation: a 20x40 addition is being made to the public school building; a large saddle and harness store is in course of erection; the City hotel has just finished the erection of a sixteen-room addition; the Champion has just finished the building of its own office; to the south of town Mr. H. C. Travers is erecting a \$3000 residence in the form of a cross; on the north of town Dr. T. F. McGee, late of Henrietta, has commenced the erection of an eight-roomed farm residence, and has just finished the building of a \$1400 drug store in town. Mr. Stine has just finished and moved into a residence in town which cost \$1300, and there are a number of smaller residences being erected. This I consider to be a very good showing for a town which never had a boom.

How are the counties to the south of Potter settling up? The answer was, very rapidly. There are fully double the number of settlers that there were a year ago. Towns are

springing up as by magic. And, he continued, the trade for a hundred and fifty miles West, Southwest, South and Southeast is all tributary to Amarillo. This is the reason of her vast trade. Can good school sections of land be ken up within easy distance of Amarillo? was next asked. Yes, he answered. If a man wants to make a home and raise crops instead of raising a bonus, I will show him good and within four or five miles of Amarillo, where there are valleys of alluvial soil of from 300 to 400 acres, as rich as the valley of the Nile, abundantly watered with never falling springs, or with good, pure water which can be obtained by digging from twenty to forty feet. This has been made possible by the American pastoral land and cattle company, which has the land leased and will relinquish to actual settlers who intend to make permanent improvements. This company intends to

chance to locate on school land, which at the same time will make their patented sections more valuable. Regarding the location of the Panhandle immigration bureau, how do your

move its pasture fence several miles fur-

ther north so as to give the settler a

people stand? With possibly one or two exceptions. we are unitedly in favor of Fort Worth, and this because THE GAZETTE is the friend of the Panhandle settler and has always stood by our interests in the time of adversity as well as prosperity. There is a feeling that the Panhandle immigration boomers should stand by the town whose paper has championed their in-

There is one thing I would like Tue GAZETTE to advocate next year, he said, and that is to postpone the opening of the Spring Palace three or four weeks, so as to give the Panhandle proper a chance to show what we can raise. are much further north and our elevation of 8700 feet places us in the same latitude as regards seasons, as Illinois. Now, when the wheat, oats and barley are in the full ear around Fort Worth our crops are but yet in the boot, so you can see that we are placed at a disadvantage in this respect. But come what may Potter county will be represented at the Spring Palace next year, if I have to bring only the products of my ex-

perimental farm. Referring to the scores of health seekers who are flocking to Amarillo, he said that the Amarillo was crowded with guests, but that next week the annex, containing thirty elegant and spacious rooms, would be opened to the public. Rattling along he then said, do not forget to mention the grand Methodist camp meeting which is to be held in the famous Palo Duro canyon, commenc ing on Friday, June 27. Such enthusiasm prevails among our cattlemen, that they have promised to donate the beeves to supply the fiesh, and our merchants the flour to make bread to feed the multitude who expect to be there. We expect to have a meeting up there that will put the Sam Jones meeting in Fort Worth

in the shade. Mr. Brookes had not half had his say but pressing duties called the reporter elsewhere. The last thing he heard was an invitation to come to the Panhandle country and live.

where he thinks he can get in a little work against Manager Southgate of the Auditorium. Mr. Southgate controls the

Daily Review.

OFFICE OF THE GAMETE. FORT WORTH, THE., May 19, 1800. The exceedingly pleasant weather continues, and this, together with the large crowds of people in the city and the immense business being transacted, causes the heart of the merchant to be glad. To-day opened the week with not the slightest decrease in the volume or business, and all indications point to a big week shead in both retail and wholesale lines. All wholesale and jobbing houses made good shipments of goods to out-of-town customers to-day, many of

goods to cut-of-town customers to-day, many of
the orders being placed in person.

The general markets, produce and provisions
of all kinds, were well patronized to-day, and
dealers had to hustle to supply the demand,
there being nothing like a surplus carried over
from Saturday in many commodities, though
receipts were better toward the close of the day
and dealers are confident of supplying the trade
promptly atto-morrow's opening. There are no
important changes in any article quoted to-day
except that eggs were slightly higher, retailing
at 20c, owing to a temporary scarcity. This
won't last. The same might be said of poultry.
All commodities closed firm to-night.

The Cotton Situation.

The New York Commercial Bulletin says: With the speculatively inclined element pretty much all on one side of the market it is a difficult matter to develop any wide and thoroughly satisfactory turns on value, and affairs become somewhat monotonous. Impressed with the apparent strength of the general situation the long side has of late found most friends on the old crop, and to a considerable extent on the new, but seems to have gathered in about all who cared to operate, and placed them in an attitude of waiting for their profit, yet without the benefit of a timid short interest to frighten into govering. The market therefore has once more seemed to show that whatever further stimulus it secured must come through the force of natural demand for control of the secured control. therefore has once more seemed to show that whatever further stimulus it secured must come through the force of natural demand for consumption, and it has also looked very much as though a tweive cent level for August was about where most holders would be satisfied to accept their profit, and might be a point at which short selling would be indulged in on the later mouths provided they advanced in proportion. Spinners' purchases during the week have been made without hurry or unusual freedom, the foreign body feeling easy in view of the supply before them, and home consumers because cost was objectionable, and they were inclined to combat the market by investing upon the hand-to-mouth basis.

Iron and Steel Statistics. The statistical report of the American iron and steel association for 1889 shows that 1889 was a prosperous year for iron and steel manufacturers on both sides of the Atlantic, and that the world's production of pig iron and steel in that year was much larger than in any preceding year. The report contains tables showing the production of iron ore, coal, pig iron and steel by all countries, from which it appears that the United States now produces 26 per cent, of all the iron ore that is mined, 26 per cent, of all the coal, 30 per cent, of al of all the pig iron, and 32 per cent, of all the steel that is manufactured. The world's annual sted that is manufactured. The world's annual production of iron ore is placed at \$3,289,000 tons; of coal, \$42,000,000 tons; of pig iron, 24,809,000 tons, and of steel, 10,513,000 tons. The world's production of pig iron has increased 76 per cent. since 1875, and its production of steel has increased in the same period 249 per cent. the figures for 1875 being respectively 14,117,000 tons and 3,021,000 tons.
The following is a general summary of the statistics for the United States for 1889, as compared with 1882:
